

Communication, Access Control
and Security Solutions

Security for life.

Security within healthcare settings is more than just a business issue for administrators, staff and patients. It's a critical component of a lifesaving institution.

When protecting lives is your responsibility,
Aiphone has the solution you can trust—
today and tomorrow.

Garages

Applications: Emergency Call, Security, Ticket Stanchions

Whether there's trouble or simply a lost card key, empower staff and visitors with the safety and security of immediate assistance. Instant communication at ticket stanchions, stairwells and other locations throughout a parking structure are basic needs for any system. Heighten effectiveness with access control integration, call forwarding, scan monitoring and event logging.

Suggested Systems:

- AX Series Integrated Intercom
- NDRM Rack Mount Security Intercom
- AN-8000 Series IP Network Intercom

IS Series IP Video Intercom

Because every second counts. Answering a patient's urgent call for help. Controlling access to restricted areas. Making sure records and materials are maintained securely. Relaying vital information immediately to staff. When lives are on the line, Aiphone is there.

Patient to Staff Communication

Applications: Nurse Call, Exam Room

Ensure patients have vital access to nursing staff, from simple bedside call buttons or pull cords to sophisticated monitoring systems. Two-way communication and call-in prioritization according to urgency and time of call enable staff to prioritize and visualize the urgency of multiple calls.

Suggested Systems:
NHX Nurse Call System

NHX Nurse Call System

Internal Communications

Applications: Staff to Staff

Increase staff efficiency and prevent costly misunderstanding by using interdepartmental communication and overhead paging. Multiple paging zones, call transfer and conference calling options provide convenient means to instantly locate and relay messages and instructions to staff.

Bringing quality to life. Assisted living residents expect more than quality protection. They want quality of life. Aiphone offers integrated systems with features and reliability that enrich residents' daily lives and give peace of mind to facility administrators, relatives and staff.

Visitor to Resident Communication

Applications: Main Entry to Tenant, Individual Tenant Doors

Enable residents to clearly identify visitors before permitting entry into secured buildings or apartments. Panic call buttons and security desk/nurse station communication to both tenant and entry panel provide additional security.

Suggested Systems:
 JF Series Hands-free Video Intercom
 GT Series Multi-Tenant Video Entry Security
 KB Series Video Sentry Tilt

Resident to Staff Alert

Applications: Nurse Call

From emergency pull cords and bathroom call stations to sophisticated monitoring systems, Aiphone offers assisted living facilities the flexibility and scalability required to ensure residents have access to help at all times.

Systems for every application. Whether you are designing a new healthcare facility or improving the effectiveness of an existing security and communications system, Aiphone's comprehensive suite of products provides the compatibility, reliability and flexibility lifesaving institutions require.

Compatibility. To address the many security and communication needs of a facility, Aiphone products are specifically designed to complement CCTV, staff card readers and other systems.

Reliability. Aiphone systems are proven performers in healthcare settings, where the ability to recognize and respond immediately to safety and security concerns is paramount to providing quality care.

Flexibility. Aiphone's unmatched product selection and industry-recognized customer service ensure a seamless working partnership and the best possible solution. From integration and customization needs to product specification questions, our experienced technical and customer support teams have the answer.

Controlled Access

Applications: Pharmacies, Nurse Stations, Administrative Offices, Nurseries, Clinic Entrances

Prevent unauthorized access to materials and sensitive areas with Aiphone's convenient access control systems. Options such as audio/video confirmation with selective door release and integration with staff card readers provide tailored solutions to specific access control needs.
