DESCRIPTION:

The JMW-BA is a long distance / CCTV adaptor for the JM Series. Used as a long distance adaptor, it will allow the distance to the video door station to be extended to up to 980'. Used as a CCTV adaptor, it will allow for an analog CCTV camera to be connected in conjunction with the GT-D audio door station. The JMW-BA will surface mount using the mounting holes or with the W-DIN11 mounting rail. It is powered with a PS-2420UL. Each JMW-BA is used for one feature only. For multiple cameras or if both features are required, add the appropriate number of adaptors.

JMWB-BA FEATURES:

- Long distance adaptor for up to 980' to door
- CCTV camera adaptor with audio door station
