

Aiphone Launches the IX | IXG Series – Revolutionizing Security Communication Solutions

Redmond, WA – April 1, 2024 – Aiphone, the global leader in intercom and security communication products, proudly announces the debut of its groundbreaking IX | IXG Series. This innovative release seamlessly combines the power of Aiphone's industry leading IX Series commercial video intercom with the robust capabilities of IXG Series multi-tenant video intercom.

“The IX | IXG Series is a testament to Aiphone’s commitment to meeting the diverse needs of our customers,” said Sean Peterson, Director of Product, Marketing, and Support at Aiphone. “This firmware update eliminates the need for separate IX and IXG products, consolidating them into a single, unified solution that seamlessly adapts to commercial, multi-tenant, and mixed-use properties, establishing the IX | IXG Series as the most versatile security communication solution available.”

The series redefines IP video intercom technology through advanced features designed to enhance security, streamline communication, and ensure seamless integration across various applications. Aiphone's new IX | IXG Series is set to transform the landscape of security communication, providing the most complete solution available on the market today.

Key Features and Benefits

The IX | IXG Series boasts several advanced features designed to elevate security and communication, including:

- **Seamless Integration:** Designed with interoperability in mind, the IX | IXG Series integrates seamlessly with the industry’s leading providers of IP cameras, video management solutions, and access control systems.
- **Hardware and Software Options:** Users can choose from full-features or lightweight physical answering stations, as well as PC-based and mobile app options, ensuring flexibility and convenience.
- **Scalability:** Offering flexible solutions suitable for small, large, and enterprise-level applications, the IX | IXG Series can easily scale to meet varying needs.

- **Adaptable Solutions:** The series provides a full spectrum of security communication solutions, catering to a wide array of applications and needs. This includes ADA-compliant rescue assistance towers, wall boxes, intercoms, commercial access entry systems, and multi-family dwelling products.
- **Remote Management:** Optimized for simplicity and convenience, AiphoneCloud allows IX | IXG Intercom systems to be updated remotely through the IXGW-(T)GW Gateway.
- **Access Control integration:** Pair with Aiphone's AC Series for enhanced security, including controlled access, visitor screening, internal communication, and seamless video monitoring.

Aiphone's commitment to innovation and quality ensures that the IX | IXG Series will set a new standard in security communication, meeting the diverse needs of various environments with cutting-edge technology and user-friendly design.

About Aiphone

Aiphone Corporation is the global leader in security communications, dedicated to creating a safer, more efficient, and better-connected world. We offer the world's largest portfolio of security communications products, ranging from audio intercoms to cutting-edge IP-based video intercoms and access control.
