DESCRIPTION

AC Key is a mobile app for the AC Series access control system that allows users to unlock doors from a smartphone or tablet. AC Key is administered by AC Nio™ management software, which can grant or revoke AC Key access at any time, as well as tracking app user and visitor activity. Users can be assigned to unlock doors across the entire site or limited to specific partitions.

AC Key works on the same local network as the AC Nio™ host, or can be used off-site by configuring port forwarding on the network.

App users can create favorite lists to quickly access frequently used doors. The app can also issue temporary Visitor Passes. Visitor Passes can be sent to visitors by text or email, granting limited access for a set period of time and number of uses. The visitor does not need to install AC Key to accept the Visitor's Pass, which is controlled from a web interface.

AC Key is available for Apple® iOS and Google Android™ smartphones or tablets. The iOS app supports devices running iOS version 13.4 or higher, while the Android™ app requires Android 5.1 or higher with Google Play™ support.

FEATURES

• Unlock controlled doors from AC Key

• Track AC Key user and visitor pass activity with AC Nio™

• AC Key users to can be assigned to entire sites or specific partitions

• Works on the local network or off-site with port forwarding
