## Cisco Certified Call Manager

## AIPHONE AND CISCO INTEGRATION OVERVIEW

Experience seamless integration between Aiphone IX | IXG Series and Cisco Unified Call Manager. This powerful collaboration brings advanced IP video intercom functionality into your communications infrastructure, enabling communication between Aiphone IX | IXG stations and supported Cisco extensions.

By registering Aiphone IX | IXG Series audio and video intercoms to Cisco Unified Call Manager, organizations create a centralized SIP-based communication system that enhances operational efficiency and real time situational awareness. This integration supports SIP calling, door release, and call transfer to enable reliable communication between Aiphone stations and supported Cisco extensions. Intercom calls can be answered from any compatible SIP extension and initiate calls back to Aiphone intercoms to provide a responsive and cohesive security infrastructure.

### KEY FEATURES

- SIP Calling - Enables seamless voice and video communication between Aiphone intercoms and Cisco devices
- Door Release - Remotely unlock doors from Cisco endpoints during intercom calls
- Call Transfer - Easily redirect intercom calls to other Cisco extensions
- Aiphone | Cisco Communication - Two way communication between Aiphone stations and supported Cisco extensions to receive and initiate calls across platforms.
