

Unify visibility and communications for an entire organization with Aiphone and Genetec Security Center.

KEY FEATURES

- ✓ Monitor and communicate
- ✓ Control relay outputs
- ✓ Unlock doors
- ✓ Transfer calls
- ✓ Broadcast messages

Combining Aiphone IX|IXG intercoms with Genetec Security Center creates a unified security solution with top-tier user experience and support. Actions can be done through the Genetec Security Center client or Genetec mobile app. Intercoms integrate with Sipelia™ for communication and Omnicast™ for video management.

Intercom calls can be answered and doors can be unlocked directly through the Sipelia call window. This initiates two-way communication and live video without requiring additional stations or software.

Calls from IX-MV7 stations can be transferred to Sipelia. Messages can be broadcast to Aiphone intercoms with Sipelia Public Addressing. Door release and other onboard relays can also be activated during a call.

Intercom video can be streamed and recorded to Omnicast, where unique camera angles and evidence of visitors can be captured.

By consolidating communication, monitoring, and access control into the Genetec Security Center, an efficient security solution is created.

-  MONITOR
-  CONTROL
-  UNLOCK
-  TRANSFER
-  BROADCAST
