**Hanwha Vision**

Integration with Hanwha's Wisenet WAVE VMS delivers a robust and highly adaptable video monitoring solution.

KEY FEATURES

✓ **Stream and record 24/7**

✓ **Search intelligently**

✓ **Trigger relays**

✓ **Monitor stations from any operation system**

Maximize the capabilities of this integration by taking advantage of the comprehensive video management features available in Hanwha's Wisenet WAVE VMS.

By integrating Aiphone IX|IXG Series stations, you can leverage a highly adaptable video monitoring solution. This pairing offers an infinitely customizable IP video management platform suitable for users and organizations of all sizes and facility types.

Along with any connected IP cameras, audio and video feed from the intercoms can be streamed and recorded around the clock to Wisenet WAVE VMS.

Intercom relays, inititiating calls, and triggering pages can all be controlled through Wisenet WAVE VMS.
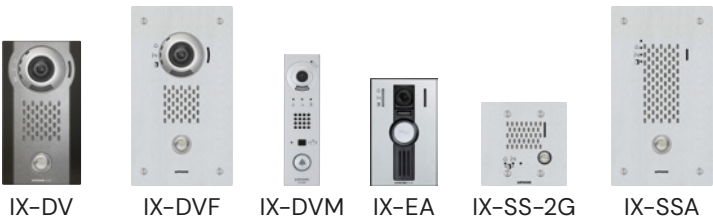

Intercom video clips can be searched intelligently by thumbnails, smart motion detection, events, or even date and time.

Providing greater flexibility, the IX|IXG Series intercom stations can be monitored from any operation system with Wisenet WAVE VMS.
