

PRODUCT DRAWING

MOUNTING

- Determine length of Acoustic tube(AI-100), whose lower Junction-connector is to be connected with Extension tube(IAX-100) Red-marked edge.
- Extension tube(IAX-100) is cut off precisely at the location pre-measured. It is the ideal location that touches the bottom of fixing flange(FF-100).
- Remove the Junction-connector from Extension tube (IAX-100), and put anew Weather-stripping (attached to Junction-connector) to lower end (mic. cord side) of Acoustic interface kit (AI-100).

FUNCTIONS

IAX-100 is a 1m long aluminum tube to extend IAI-100(Driver unit + Acoustic interface kit) to up and downward.

SPECIFICATIONS

Housing	Aluminum casting (Silver almite process).			
Weight	650g(approx.)			
Remarks	Compatible with Driver unit/Acoustic interface kit(IAI-100)			
DESCRIPTION EXTENSION TUBE (Security window intercom)	FIG. NAME PRODUCT/SPEC./FCN.	UNIT mm	DATE 24 June, 2005	
MODEL NO. IAX-100	FIG.NO. 01779301-1-1	PAGE 1/1	REVISION 1	AIPHONE
