# AIPHONE

IX Bell Schedule Tool
Bell Schedule Software for the IX Series

DESCRIPTION

The IX Bell Schedule Tool is software designed to aid in the creation and updating of batch bell schedules on an IX Series installation. Up to 10 different bell schedules can be created consisting of up to 50 weekly events and up to 50 daily events. Bell schedule events are made up of built-in tones, as well as custom .wav files uploaded through IX Support Tool. Different bell schedules can be linked to different groups of stations, allowing for customization between the different groups. The IX Bell Schedule Tool protects the system's programming by only allowing bell schedule changes.

FEATURES

- Create bell schedules for multiple stations simultaneously
- Works with existing IX Support Tool Configuration
- Customize up to 10 schedules for various events (normal day, half day, holiday)
- Weekly events allow for recurring chimes
- Daily events allow for special one-off events
- Easy-to-use bell schedule adjustment without affecting other settings
