IX Series 2
IX-RS Sub Master Door Release Settings

GENERAL OVERVIEW:

The IX-RS audio only sub station can be configured to receive incoming calls from door stations and trigger door release. These settings add features to the station while still maintaining its primary functionalities.

Calling the IX-RS

1.1 - Station View

Switch from **Table View** to **Station View** by clicking the Station View button in the top left corner of Support Tool.

1.2 - Called Stations

Expand **Call Settings** and click **Called Stations (Door/Sub Stations).**

1.3 - Select a Station

Use the drop-down menu to choose the station number of the door station to call the IX-RS and click **Select**.

●Called Stations (Door/Sub Stations)

U = Unicast, M = Multicast
If designating "M", multicast IP addresses must be configured for the station(s).
To register a VoIP Phone, go to Network Settings -> SIP and enter the IP address of the SIP Primary Server.
Only one VoIP Phone can be set per group.
