**Enabling Master Station Option Inputs**

An IX-MV7-* master station has four customizable contact inputs that can be used to trigger an outgoing call, answer an incoming call, trigger several types of pages, and other optional features. This guide will provide detailed instructions to configure the following: **Call**, **Answer Call/Page**, **Paging**, and **Message Page**. Some of these steps may refer to other documents providing information about **Group creation** and **uploading/settings chimes and sounds**.

### 1.1 - Station View

Switch from **Table View** to **Station View** by clicking the **Station View** button in the top left-hand of Support Tool.

### 1.2 - Option Input

Expand **Option Input / Relay Output Settings** and click **Option Input**.
1.3 - Select a Station
Use the drop-down menu to choose the station number of the master station to be configured and click Select.

1.4 - Option Input / Name
Select an Option Input # (Number) using the dropdown menu. Once the desired input is selected, a Name can be given to it.

1.5 - Choose a Function
Choose a Function for this option input by selecting the radio button next to the function type.

1.6 - Contact Settings
Determine the input Type by selecting Make (normally open) or Break (normally closed), and the Detection Time Range as either Immediate, a range between 200-2000msec, or a range between 3-600sec. Use Detection Time to enter in the value of time.

1.7 - Update
Click the Update button to save changes.
**Master Station Option Input Call**

If **Call** is selected, the master station will call a single group when the input is triggered. A group must be configured under **System Information > Group** to use the Contact Input Call function.

---

2.1 - **Call Settings / Call Origination**

Expand **Call Settings** and click **Call Origination**.

2.2 - **Select a Station**

Use the drop-down menu to choose the station number of the master station to be configured and click **Select**.

2.3 - **Select an Input**

Use the drop-down menu to choose the **Option Input #** to be configured.

2.4 - **Select a Destination**

Click **Open**, under **Call Destination** to select the group to be called when the option input is triggered. Use the drop-down menu to select a call **Priority**.

2.5 - **Update**

Click the Update button.

---

Master Option Input Answer Call / Page

If Answer Call / Page is selected, an incoming call or page may be answered by triggering an option input. No further configuration is needed. Select Answer Call / Page when enabling the input then click Update.

Master Option Input Page

If Paging is selected, the master station can page a single Group or place an All Page when the input is triggered.

3.1 - Paging Settings
Expand Paging Settings and click Option Input Page.

3.2 - Select a Station
Use the drop-down menu to choose the station number of the master station to be configured and click Select.

3.3 - Select an Input
Use the drop-down menu to choose the Option Input # to be configured.

3.4 - Select a Destination
For Destination, select All Page or Group. If Group is selected, click Open and select the Group that should receive the page.

3.5 - Select a Priority
A Priority must be selected by clicking the radio button for either Normal or Urgent.

3.6 - Update
Click the Update button.

For more details about the features and information above, please contact Technical Support.

Master Option Input Message Page

If Message Page is selected, the master station can send a sound or chime to a single Group. A group must be configured under System Information > Group to use the Contact Input Message Page function.

4.1 - Paging Settings
Expand Paging Settings and click Option Input Page.

4.2 - Select a Station
Use the drop-down menu to choose the station number of the master station to be configured and click Select.

4.3 - Select an Input
Use the drop-down menu to choose the Option Input # to be configured.

4.4 - Select a Destination
For Destination, select All Page or Group. If Group is selected, click Open and select the Group that should receive the page.

4.5 - Select a Priority
A Priority must be selected by clicking the radio button for either Normal or Urgent.

4.6 - Select a Message
Use the dropdown menu for Message File Name to select a sound or chime to play, and the dropdown menu for Play Count to select the number of times the Message Page should play.

4.7 - Update
Click the Update button.
Enabling Door Station Option Inputs

A door station has six* customizable contact inputs that can be used to trigger an outgoing call or answer an incoming call. Some of these steps may refer to other documents providing information about Group creation and Setting and Uploading Chimes and Sounds.

5.1 - Station View
Switch from Table View to Station View by clicking the Station View button in the top left-hand of Support Tool.

5.2 - Option Input
Expand Option Input / Relay Output Settings and click Option Input.

5.3 - Select a Station
Use the drop-down menu to choose the station number of the door station to be configured.
Enabling Door Station Option Inputs (cont.)

5.4 - Option Input / Name
Select an Option Input # (Number) using the dropdown menu. Once the desired input is selected, a Name can be given to it.

5.5 - Choose a Function
Choose a Function for this option input by selecting the radio button next to the function type.

5.6 - Contact Settings
Determine the input Type by selecting Make (normally open) or Break (normally closed), and the Detection Time Range as either Immediate, a range between 200-2000msec, or a range between 3-600sec. Use Detection Time to enter in the value of time.

5.7 - Update
Click the Update button.

Door Station Option Input Call

If Call is selected, the door station will call a single group when the input is triggered. A group must be configured under System Information > Group to use the Contact Input Call function.

For more details about the features and information above, please contact Technical Support.
