## IX-SOFT

## PC Answering Station Software

IX-SOFT is answering station software that can be used to call and communicate with IX IXG Series stations across a network. It can also be used for monitoring, paging, and door release. The functionality and network status of each station can be verified with the Device Check and Line Supervision features.

The interactive map can be used to quickly interact with door and answering stations by selecting them individually or by dragging to select a group.

IX-SOFT requires a single, transferable lifetime license per PC, with bundles available in 1, 3, 5, or 10 licenses.
