

## Displaying Speed Dial Buttons on an IX-MV7-\* Home Screen

### Summary

IX-MV7-\* master stations can be programmed with Speed Dials, which can be used to place calls, unlock doors, and other functions. By default, these Speed Dials are accessed by navigating to the Favorites menu on the IX-MV7-\*. The default home screen can be adjusted so that the Speed Dials are always present.

### Steps

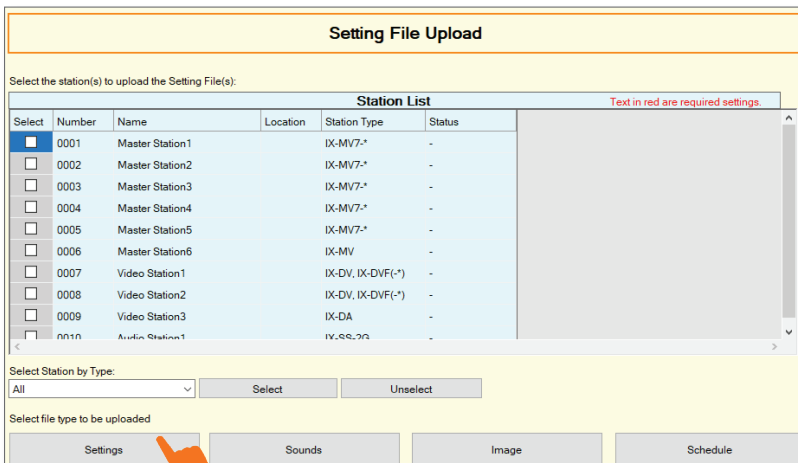

Open **IX Support Tool**. Navigate to **Function Settings**, Display Mode.

Under **Standard Mode**, Home Screen, click **Option 1** to reveal the drop-down menu. Change the selection to Option 2. Click **Update**.

#	Station Information				Function Settings		
	Identification				Display Mode		
	Number	Name	Location	Station Type	Master UI Mode	Standard Mode	Receptionist Mode
						Home Screen	Color Scheme
							Screen Layout
0001	0001	Master Station1		IX-MV7-*	Standard	Option 2	Light
						Option 1	
						Option 2	

Navigate to **File** and click Upload Settings to Stations. Select the IX-MV7-\* from the Station List and click **Settings**.
