# IXG-2C7-L
## IP Video Tenant Station with T-Coil Compatibility

## DESCRIPTION

The IXG-2C7-L is an IP video tenant station with a 7" LCD touchscreen for the IXG Series multi-tenant system. Each tenant can have up to 8 IXG-2C7/IXG-2C7-L's. The IXG-2C7-L station can answer calls from an entrance station, guard station, or individual door station. Once the call is answered, communication is hands-free (VOX).

A T-Coil hearing aid is able to pick up audio signals from the IXG-2C7-L. Touching the key button will activate the door release associated with the connected entrance station or door station. The IXG-2C7-L can selectively call other IXG-2C7-L's in the same tenant or collectively call associated mobile apps. The IXG-2C7-L can request an elevator to come to its floor. It will also retain a history of calls that it has received. The history capacity can be expanded by adding a microSD™ card.
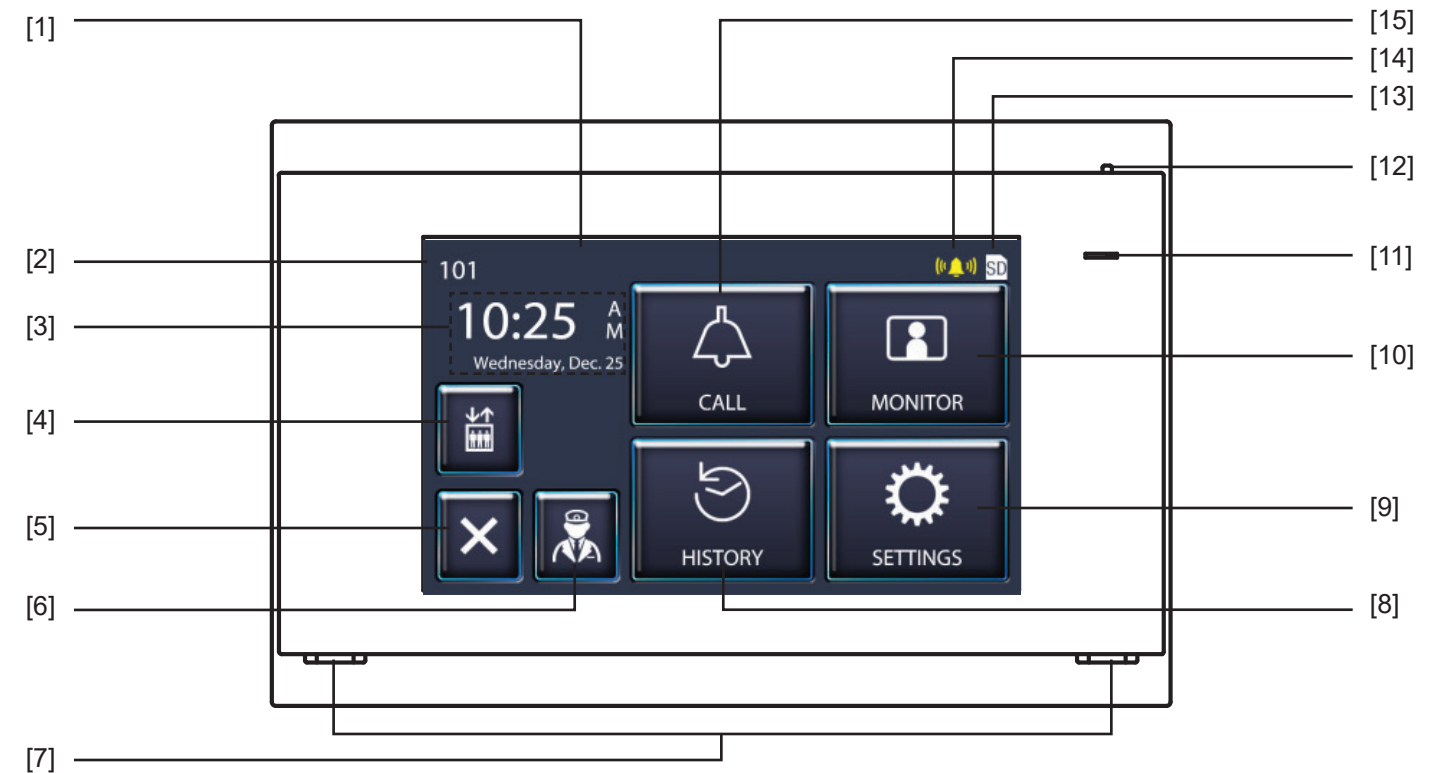

## FEATURES

- T-Coil hearing aid compatibility

- PoE compliant

- 7" LCD color touchscreen

- Hands-free audio communication

- microSD™ card slot for added memory

- Place calls to other stations within tenant

- Call concierge/guard

- Call elevator to floor

- Monitor door stations
