

A New Generation of Telephone Entry

With video, mobile apps, and cloud-based management

The IXGS-TE simplifies installation and delivers a modern access experience. It combines IP video intercom, mobile entry, and cloud-based management into one complete solution that modernizes access control for today's needs.

Why Choose the IXGS-TE Telephone Entry Kit?

All-In-One Kit

This convenient kit includes everything you need for efficient setup and future expansion.

Video Calling

Wide-angle camera ensures high quality visuals for secure, reliable video calls via IXG mobile app.

Unlock Doors from Anywhere

Answer calls and unlock doors remotely via telephone keypad or the IXG mobile app.

AiphoneCloud Remote Management

Configure and update intercom systems off-site using AiphoneCloud.

Scalable for Any Property

Supports commercial and residential multi-tenant buildings.
