

# Aiphone IX|IXG Series and Intellicene Symphia unites intercom and video management for faster, smarter security responses.

## KEY FEATURES

- ✓ **Monitor security in one centralized platform**
- ✓ **Stream live video and one-way audio**
- ✓ **Intercom PTZ control**

Integration between Aiphone’s IX|IXG Series intercoms and Intellicene’s Symphia Security Operations Platform provides a unified and efficient way to monitor and manage security.

By streaming live video and one-way audio from Aiphone intercom stations directly into Symphia, security teams get complete visibility across both intercom and camera systems in a single, centralized platform. This streamlined approach reduces complexity, eliminates the need to switch between applications, and enhances situational awareness – all while helping security and IT leaders respond faster

and more effectively. Ideal for enterprise environments, campuses, and critical facilities, this solution allows organizations to leverage their existing VMS investment while extending coverage to entry and communication points.

With reliable integration and simplified management, dealers, integrators, and end users can deliver a cohesive security ecosystem that improves efficiency, strengthens incident response, and ensures facilities remain protected at every access point.
