

Unify Tenant Management with PDK Access Control and Aiphone IX|IXG Series Intercoms

KEY FEATURES

- ✓ **Enter data only once and eliminate duplicate records**
- ✓ **Reduce errors and stale credentials**
- ✓ **Accelerate move-ins and move-outs**

PDK's cloud-based access control platform, PDK.io, connects directly with AiphoneCloud Remote Management sites through a secure API.

Purposely built for multi-tenant environments, this integration unifies access control and intercom functionality into a single, streamlined workflow.

When tenant information is added to, updated in, or removed from PDK, those changes automatically propagate to the connected Aiphone IX|IXG Series intercoms

within minutes. This eliminates the need for dealers and property managers to maintain duplicate records, manually program directory entries, or coordinate updates between two separate systems.

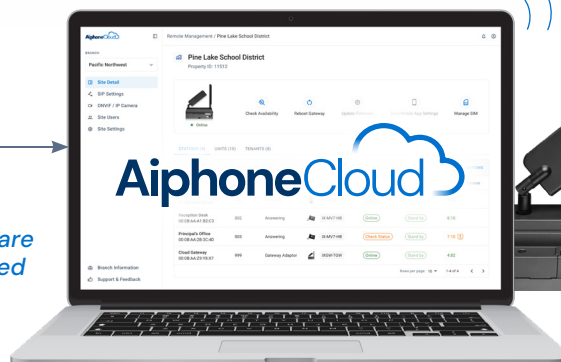

Property managers benefit from faster tenant onboarding and fewer administrative touch points. Dealers gain a scalable solution that supports both small properties and large portfolios.

The integration is available through the PDK Marketplace and requires an AiphoneCloud site paired with an IXGW-TGW gateway and compatible IX|IXG Series hardware.

All connected stations are quickly updated via the IXGW-TGW

Tenant details managed in PDK.io are automatically synced to AiphoneCloud

SUPPORTED DEVICES

IXG-DM7-HIDA

IXG-2C7

IXG Mobile App

IXGW-TGW

Platform and Version	PDK.io
Requirements	Active AiphoneCloud Site
Compatibility	IXG-DM7-HIDA, IXG-2C7, IXGW-TGW, IXG Mobile Apps
