

TW-TA-SP

Tower with Speaker

The TW-TA-SP is an aluminum tower for housing IX|IXG Series emergency stations. Made of lightweight aluminum, the tower is a durable solution for outdoor assistance and emergency call applications.

Equipped with a high-powered speaker, blue strobe light, and reflective ASSISTANCE lettering on four sides, the tower is highly discernible in areas such as campuses, parking lots, malls, courtyards, and more. The blue beacon at the top remains lit and flashes during an emergency call.

Compatible emergency stations are the IX-DVF-2RA, IX-DVF-2RA-FR, IX-DVF-RA, IX-DVF-RA-FR, IX-SSA-2RA, IX-SSA-2RA-FR, IX-SSA-RA, and IX-SSA-RA-FR. With the optional TW-SPL adaptor plate, the tower can be used with the IX-DVF and IX-SSA non-emergency call stations. To secure the tower in place, our TW-MKL L-bolt mounting kit is required.

- **High power speaker for emergency messages and tones**
- **UL-514-A listed electrical box included at the base**
- **Two access panels are located on the back**
- **ASSISTANCE lettering on front, left, right, and back sides**
