

WB-HA

Wall Box

The WB-HA is an emergency wall box with ASSISTANCE lettering and a hooded beacon. The wall box houses IX|IXG Series emergency stations.

Signage, mounting height, and 4" depth comply with ADA requirements.

Protected by a vandal-resistant hood, the beacon remains lit at all times and strobes during a call. Additional 24V DC power is required for the beacon, which can be provided by a PS-2420UL power supply, PS-POE (requires PoE+), or by providing external power to the built-in UL Listed electrical box. Power accessories can be mounted internally on a 1-gang style mounting point.

- **Reflective ASSISTANCE lettering**
- **Stainless steel construction**
- **Beacon protected by vandal-resistant hood**
- **Beacon is always lit and strobes during emergency calls (requires 24V DC)**
- **ADA compliant**
