Handling Precautions Manual
(Précautions d'utilisation)

To Contractors / À l'adresse des sous-traitants
Manuels techniques WL sont disponibles sur notre site web (www.airphone.net).
Veuillez consulter les instructions fournies à cet effet.
Les manuels techniques WL sont disponibles sur notre site web (www.airphone.net).
Même si vous assumez que cette information est fournie aux clients.

Do not dismantle or alter the unit. 
Do not handle any objects into the unit through the openings. 
Do not place or store any flammable or corrosive or flammable liquids or substances in the unit. 
Do not expose the power adapter. 
Do not immerse or electric shock. 
Do not connect the device during a thunderstorm. 
Do not use the product if the product or any part of it is damaged, disassembled, or modified. 
Do not use the device with an unstable voltage or current. 
Do not use the device with a power adapter other than the one specified by Airphone.

Do not plug or unplug unit with wet hands. 
Periodically check and remove dust from the power plug.

Do not use the device in the following environments: 
- In a location where there is a risk of explosion, such as a hospital. 
- In an operating room, an operating unit, a laboratory, or a medical area.
- In places where there are flammable or explosive gas or substances, such as near a receptacle or in a vending machine. 
- In places or areas where there is an oxygen cylinder or other such location where flammable or explosive gases may be present.

Danger / Danger
Do not use an unspecified rechargeable battery with the master station. 
Do not use a battery with the plus (+) and minus (-) reversed. 
Use the included battery pack as a rechargeable battery for the master station only. Do not use it with other devices. 
Do not use the battery without the case or the battery case. 
Do not use the battery without a connector. 
Do not use the battery with a connector or a battery case. 
Do not use the battery without a connector with the case. 
Do not use a battery if it is hot or cold. 
Do not disassemble, modify, or add adhesives. 
Do not change the plus (+) and minus (-) ends with a needle or other metal object. 
Do not damage or damage the rechargeable battery pack with the battery cover. 
Do not carry or store a battery together with a metal necklace, bracelet, or similar object.

The liquids of rechargeable batteries and other batteries are dangerous to the eye. 
There is a risk of blindness. 
If liquid enters the eye, do not rub the eye. 
Follow medical treatment from a doctor immediately. 

N'employez pas le dispositif dans un emplacement où il n'est pas susceptible d'être bouleversé par des parties mobiles, telles que lesdoigts.

Aiphone Co., Ltd. | © [www.airphone.net]
**Warning / Avertissement**

- Do not peel or scratch the outer tubing of the rechargeable battery or other batteries.
- Do not splash with or immerse in freshwater or ocean water.
- Do not use the battery if a liquid or a foreign object has entered the battery compartment.
- Do not use the battery if it is damaged or cracked.
- Do not touch the battery terminals with wet hands.
- Do not charge dry cell batteries.
- If you notice anything unusual, such as odor, discoloration, or changes in the shape, stop using the equipment and contact the nearest service center.

If a liquid of a rechargeable battery or battery adheres to skin or clothing, wash the area immediately with clean water.

If the remaining power is low, replace the battery.

Strictly observe the expiry date of batteries.

Immediately remove batteries that cannot be used any longer.

Keep away from fire when liquid leaks or offensive smells are present.

- Do not use or expose the equipment near water.

Storage instructions:

- Do not use or store the product in a high temperature location.
- Do not expose the product to direct sunlight for extended periods of time.
- Do not expose the product to water or high humidity.
- Do not expose the product to dust or dirt.
- Do not expose the product to strong vibrations or shock.
- Do not expose the product to extreme temperatures.

Caution / Attention

- Do not apply strong impacts or throw the product. This can cause liquid leaks, reduce the device's lifetime, or cause the battery to explode.
- The charging temperature range of the rechargeable battery is 0°C to 45°C. Charging outside this temperature range may cause liquid leaks, reduce the device's lifetime, or cause the battery to explode.

- Do not use or expose the product in environments where it may be exposed to light, heat, or other extreme conditions.

- Do not use or expose the product in environments where it may be exposed to high humidity or temperature.

- Do not use or expose the product in environments where it may be exposed to dust or dirt.

- Do not use or expose the product in environments where it may be exposed to strong vibrations or shock.

- Do not use or expose the product in environments where it may be exposed to extreme temperatures.

**Communication of master station and door station**

- The distance is too far or the following obstacles are present within about 10 m from the reception window, which may cause static, communication disconnections, video dropouts, and visual distortion such that usage may not be possible.

- Make sure the room is well-ventilated.
- A conductive or metallic wall may also cause signal attenuation.
- Do not use the equipment in a metal frame or building.

When monitoring or talking master station and video door station, please use the product at least 20 cm (8 inch) away from your body. Lors de la manutention de l'interphone ou lorsque vous partez dans le combiné, maintenez le produit à au moins 20 cm de votre corps.

**Considerations during use**

**Installation**

- Avoid installing the equipment in the following locations (master station):
  - Near fire, heaters, and humidifiers (causes deformation and malfunctions)
  - Near televisions, radios, personal computers, and other office devices, air conditioners, water heater remote controls (with interconnected functions), and home security-related equipment (cause noise)
  - Within about 3 m of other wireless devices (causes electromagnetic interference)
  - In direct sunlight or near air-conditioning equipment (causes malfunctions, deformations, and breakdowns when the temperature is above 40°C or below 0°C)
  - Locations with large temperature changes (condensation causes malfunctions)

- Charging stand of the master station:

  - Do not place near an AM radio (causes static on the AM radio)
  - Do not place near televisions, speakers, and other radio devices that generate electromagnetic waves or magnetism (charging may not be possible)

Insert the power plug into an outlet nearby the installation location so that it can be inserted and removed easily.

**FCC**

FCC PART 15

This equipment has been tested and found to comply with the requirements for a Class B digital device under Part 15 of the Federal Communications Commission (FCC) rules. These requirements are intended to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If the equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications to this equipment not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation. Proprietary communications may not be assured when using this telephone.

To ensure safety of users, the FCC has established criteria for the amount of radio frequency energy that can be safely absorbed by a user or bystander according to the intended usage of the product. This equipment has been tested and found to comply with the FCC criteria. To comply with FCC RF exposure requirements, the device must be installed and operated within 30 cm (12 inches) or more between the product and all persons.

**ISED**

Identification, Science and Economic Development Canada

This Class B digital apparatus complies with Canadian ICES-003 and NMB-003 (CSA).

This device complies with Industry Canada's license-exempt RSSs. Operation is subject to the following two conditions:

(1) This device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device. The present apparatus is conform to the CCR of Industry Canada applicable to apparatus radio exempts of licence. The operation is authorized to the actor conditions subordinates:

(1) IEC 60950-1
(2) IEC 61326-1

For the plate de vue, informations importantes sur la sécurité concernant l'exposition aux radionucléides (RF). Les directives sur les manipulations ne sont pas disponibles au moment de l'impression.

**RF Exposure Information (SAR) / Informations d'exposition RF (SAR)**

For Monitor unit:

- Specific Absorption Rate (SAR) value for body: 0.21 W/kg
- This product is designed and configured to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the United States.

For Camera unit:

- Specific absorption information regarding radio frequency (RF) radiation exposure: RF exposure guidelines require that the device be used at a minimum of 20 cm from the human body.

For the plate de vue:

- Informations importantes sur la sécurité concernant l'exposition aux radionucléides (RF). Les directives sur les manipulations ne sont pas disponibles au moment de l'impression.
