Part Names and Function

Video door station

- Camera angle adjustment lever
- Camera protective film
- Battery cover
- Mounting frame
- Power cable
- Locking screw
- LED for right illumination
- Illumination sensor

Functions manipulated by the function buttons F1, F2, F3 are displayed on the screen when available.

Caution

* Loud sounds can occur suddenly, so keep this section away from your ear.
Charging the Master station

Charge the master station for 16 hours before using it for the first time.

1. Open the battery cover
2. Connect the connector of the battery pack to the connector terminal inside the battery cover
3. Set the battery pack, and close the battery cover
4. Place the master station on the charging stand

**Notes**
- Charging time increases in the following conditions.
  - The operation temperature is low.
  - The AC power voltage is low.
  - The master station was used during charging.
  - The reception status of this unit is “Out of range”.
- Set the master station on the charging stand when it is not in use. Overcharging does not occur even when the master station is always on the stand.
- The status indicator may not switch off immediately when this unit is removed from the charging stand.
- The remaining battery power displayed on the battery pack in use may be lower than the actual value.
- APH-ONE in the display area after the master station is switched on, and the status indicator switches on.

**Warning**
- Do not peel all the vinyl cover of the battery pack.
  - If this unit will be removed from the charging stand or the power adapter will be unplugged for one week or more, remove the connector and remove the battery pack. (This maintains the battery pack performance and prevents consumption of the battery pack.)

Installing the Video door station

1. Remove the mounting frame from the video door station
2. Remove the battery cover
3. Insert six AA batteries (batteries not included)
4. Attach the battery cover

**Notes**
- Do not use wood screws when attaching to a switchbox.
  - Mounting may not be possible depending on the wall surface.

Setting the Date and Time

Set the date and time before using it for the first time. The date and time is used for the listed dates and times of recordings.

**Notes**
- The date and time may revert to the default setting when, for example, the battery pack is removed, etc. In such cases, set the date and time again.
- Clock accuracy may deviate as much as 1 minute per month. We recommend configuring the date and time periodically.

1. Press [F2] (Menu) on the standby screen
2. Select “Date & Time” using [F2] (V) and press [F2] (Select)
3. Configure the current date and time using [F1] (A) or [F2] (V) and press [F3] (Select)
4. Repeat Step 3 and configure the month, year, hour, and minute

**Notes**
- The items to be configured flashes in yellow.
- How to change the date and time:
  - [F2] (V): Increases the value by 1.
  - [F2] (A): Decreases the value by 1.
  - If [F2] (A) is pressed when the maximum value is displayed, the value returns to the minimum value.

Receiving a call

1. Press [F2] (Menu) on the standby screen
2. Select “Date & Time” using [F2] (V) and press [F2] (Select)
3. Configure the current date and time using [F1] (A) or [F2] (V) and press [F3] (Select)
4. Repeat Step 3 and configure the month, year, hour, and minute

**Notes**
- When there is no response after the master station rings, the call will be ended after approx. 30 seconds. The screen will return to the standby screen.
- Communication time is approx. 1 minute.
- When the ambient noise is loud enough to interrupt the audio transmission, the LED of the video door station blinks and the volume of the audio is automatically increased.
- When a call is received from the video door station, image recording will start automatically. During recording, “REC” (Recording video) is displayed in the screen.
- The right illumination LED of the video door station is turned off when a call is received.
- The display approx. 5 seconds from when the call button of the other door station is pressed while images are displayed.
- When the master station is placed on the charging stand during communication, the screen will return to the standby screen.
