The stainless steel wall mount box provides an easy-to-see, heavy duty enclosure for the IX and IS Series call stations, used in emergency and assistance applications. Installed in a wide variety of locales such as parking garages, airports, campuses, and malls, these stations provide proper signage and specifications to meet ADA requirements. The beacon/strobe is always lit for easy visibility and flashes during an emergency call-in.

ADA (28 CFR Part 36 section 4.4.1) states that an object must not protrude more than 4” if mounted higher than 27”. Since these units have the potential to include a camera, mounting height restrictions are avoided with this streamline design, while call button mounting height guidelines can still be met.

### FEATURES

- UL Listed electrical box included
- Built-in threaded studs to mount additional products (power supply, relay, etc.)
- Beacon/Strobe light on top
- Signage on sides available in either EMERGENCY or ASSISTANCE
- ADA Compliant: 4” depth to meet ADA requirements to allow mounting higher than 27”, and proper signage and call button mounting height

### SPECIFICATIONS

<p>| Material: | 12-gauge stainless steel |
| Mounting Hardware: | Internal threads (Female: M3 x .05, 1-gang spacing pattern) 1 pair |</p>
